Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>2-4, 6-8</u>	YES
	Claims	<u>1, 5</u>	NO
Inventive step (IS)	Claims	<u></u>	YES
	Claims	<u>1-8</u>	NO
Industrial applicability (IA)	Claims	<u>1-8</u>	YES
	Claims	<u></u>	NO

2. Citations and explanations (Rule 70.7)

Document cited in the International Search Report:

D1: WO 0031426 A1

D1 discloses a rolling bearing according to the preamble of claim 1.

Furthermore, in the known rolling bearing the wire can be ground when it has been wound to an initial shape to produce raceways with greater contact surfaces than are obtained with a round wire in the spring (refer to page 12, line 35- page 13, line 3).

If the wire is ground sufficiently maximum possible contact should be obtained between the outer surface of the rolling body and the raceway.

The subject matter of claims 1 and 5, therefore, lacks novelty.

Claims 2-4 and 6-8 only seem to contain such technical features which a person skilled in the art would regard as normal design possibilities.

Claims 2-4 and 6-8, therefore, lack inventive step.
